Guide to Course Listings:

ART

DRAWING

This course teaches basic drawing skills and techniques by drawing from observation. Through sighting and measuring three-dimensional forms and creating the illusion of volume, space, and light on two-dimensional surfaces, students will develop visual language skills. We will work with a variety of black-and-white media to create compositions. Historic references will broaden the student's understanding of drawing as a visual language.

Prerequisite: None

Section III
U79 101 (3 units)
MW 5:30p-8:15p
Tuition \$1,995

WATERCOLOR

This course teaches students the fundamentals of the watercolor through the use of a small portable sketchbook and pan watercolor set. The class is designed for all skill levels, and no previous experience is necessary. The goal is to explore properties of color and value by creating a sketchbook of studies that explore technical processes of watercolor, such as washes, glazes, and resists, through a variety of subject matter such as still life, land/urbanscapes, self-portrait, and figure studies. We also investigate historical research and artistic vocabulary through class critiques and written papers.

Prerequisite: None

Section III
U79 124 (3 units)
MW 6:00p-8:45p
Tuition \$1,995

BIOLOGY

GENERAL BIOLOGY I

First part of a two-semester rigorous introduction to basic biological principles and concepts. This course covers the molecular and cellular basis of life, bioenergetics, signal transduction, DNA and protein synthesis, and the function of whole organisms (physiology). Laboratories include traditional wet labs as well as inquiry-based, on-line labs.

Prerequisite: high school biology (preferably honors level) and AP chemistry

Section II
U29 101 (4 units)
MWF 6:00p-8:30p and TuTh 5:00p-9:00p
Tuition: \$3,520; Lab fee: \$275

GENERAL BIOLOGY II

Second semester of a two-semester sequence that provides a broad but rigorous introduction to basic biological principles and concepts. This course covers DNA technology and genomics, the genetic basis of development, the mechanisms of evolution, the evolutionary history of biological diversity, plant form and function, and ecology. Laboratories include traditional wet labs as well as inquiry-based on-line labs.

Prerequisite: AP biology and chemistry

Section IV
U29 102 (4 units)
MWF 6:00p-8:30p and TuTh 5:00p-9:00p
Tuition: \$3,520; Lab fee: \$275

COMMUNICATIONS

INTRODUCTION TO PUBLIC SPEAKING

Public speaking is a skill essential for success in most professional careers. The focus of this class is to develop the basic ability and confidence necessary to speak effectively in public. The presentation skills we will work on are proper diction, projection, breath control, effective use of the voice and body, writing to be heard not read, oral critiques, and informative and persuasive speaking. Critical listening and group work will also be emphasized.

Prerequisite: None

ENGLISH COMPOSITION

CRITICAL AND RESEARCH WRITING

This course teaches students to engage critically with scholarship, construct convincing arguments, and write persuasive research papers. We will study how other writers achieve these goals, then use a proven model of researched writing to write an argument and paper about a text of your own choosing that includes accurate use of primary and secondary sources. Concentrating on a single research project throughout the Section, attention will be given to revision

and organization, library research strategies, academic citation conventions, and electronic search engines and sources.

Prerequisite: AP English Comp
