Early College Scholars
2018 Summer Online Course Listings

Please note the following:
1. These course listings are subject to change and cancellation without notice.
2. Students are permitted to enroll in a maximum of 7 units.
3. Students must meet all prerequisites listed in order to receive permission to enroll in a course.
4. If a course is full, it will be indicated in the course description.

2018 Online Session Dates:
- June 11-August 3

Guide to Course Listings:

ANCIENT CIVILIZATIONS OF THE NEW WORLD
An examination of the Inca empire in Peru, and the Maya and Aztec empires in Mexico through the inquiry into the roots, development, form, and evolutionary history of pre-Colombian civilization in each region from its earliest times to the rise of the classic kingdoms. Examples of respective artistic accomplishments will be presented and discussed.
Prerequisite: None
Section III
L48 310C (3 units)
Tuition: $1,995

INTRODUCTION TO ENVIRONMENTAL STUDIES
This course examines the physical, chemical, and biological components of the environment. We will focus on the ecological principles that are the basis of environmental science. We will then explore how environmental studies incorporate concepts from politics, social sciences, economics, ethics, and philosophy. A central theme of the course is the effect of human societies on the environment, and how individual human and societal behavior can be modified to minimize the deleterious effects on the environment.
Prerequisite: None
Section III
U29 209 (3 units)
Tuition: $1,995

BEGINNING FRENCH I: AN AUDIOVISUAL APPROACH
This eight-week intensive is a fully online course for all students who are new to French or who need to review the basics. Perfect for those who wish to prepare for a trip to Paris, or to get a head start on their college language and culture requirements. Using the new online program developed by Vista Higher Learning, Portails, this course provides authentic materials integrated into a convenient and user-friendly format. The course keeps a sense of a close-knit classroom community through its chat-rooms and discussion boards, while students are able to work according to their schedules.
Prerequisite: None
Section III
U12 106 (3 units)
Tuition: $1,995

APPLIED STATISTICS
This is a first course in statistics with examples and applications from a variety of disciplines, and emphasis on the social, behavioral, and natural sciences. Students learn about key topics and statistical methods that may be applied to areas such as economics, mathematics, psychology, business, and health sciences, to name a few. The course provides a foundation in descriptive and inferential statistics, and in probability.
Prerequisite: college algebra or equivalent.
Session III
U20 205 (3 units)
Tuition: $1,995

INTRODUCTION TO STATISTICAL PROGRAMMING WITH R
In this online course, students learn how to work with data using the R package. R is a computer language that is often used for statistical analysis and computations. This course will include a short introduction to terms and concepts from descriptive statistics (mean, median and frequency, for example), but this is not a statistics course. No prior programming or statistics is required, although both/either would be helpful. This is a fully online course, but optional on-campus meetings will be held periodically for students who would like face-to-face interactions with the instructor and fellow students.
Prerequisite: college algebra or equivalent.
Session III
U20 124 (3 units)
Tuition: $1,995
THE ART OF MATHEMATICAL THINKING
Mathematics plays an important role in society, from engineering to architecture to the social and behavioral sciences. This fully online course exposes nonmath majors to fascinating sides of mathematics that are typically not discussed in standard math courses. Students learn effective thinking techniques with applications beyond standard mathematics and discover exciting ideas and new perspectives about the world. We look at questions like: What do rabbits, piano keyboards, and pine cones have to do with the Parthenon? What do secret codes and bar codes have to do with number systems and prime numbers? What are some uses and misuses of mathematics in everyday life? Why are coincidences not so amazing after all?

Prerequisite: None

Session III
U20 210 (3 units)
Tuition: $1,995

BUSINESS ETHICS
This course covers a wide range of business topics that have ethical elements and consequences. Students will examine various issues and consider what personal and corporate responsibility demands in various situations, as well as what the obligations of justice command. Issues that may be discussed include employment at will, whistleblowers, discrimination, harassment, affirmative action, and business responsibility toward consumers, the environment, and customers, and whether the sole moral obligation of businesses is to make money.

Prerequisite: None

Session III
U22 234 (3 units)
Tuition: $1,995

ONLINE INTERMEDIATE SPANISH I
This online approach to intermediate-level reading, speaking, and writing in Spanish includes an introduction to important cultural aspects of Latin American and Spanish culture. We will use the Internet, videos, and traditional textbooks to complete an intermediate level Spanish grammar review.

Prerequisite: two years of high school Spanish

Session III
U27 250 (3 units)
Tuition: $1,995
